RE: RESTORATION PROCLAMATION - BEAR RIVER

The Chief Deputy State Engineer explained to those present at the hearing that the public hearing was open for discussion in the matter of which applications, so deposited during the period of publication of such notice, are most conducive to the public good, and the filing of such applications in order of priority according to such determination.

After some discussion there was submitted to the group for their inspection the applications deposited with the State Engineer during the period of publication and the proposed priority of each application.

It was further explained to the group that two applications deposited during the period of publication had been eliminated from the list for the following reasons:

(a) Application submitted by the Utah State Department of Fish and Game for 4 c.f.s. of water from 4 wells, their points of diversion being as follows:

(1) S. 115' and E. 545'   (2) S. 135' and E. 540'
(3) S. 160' and E. 545'   (4) S. 180' and E. 540'

all from the W$\frac{1}{4}$ Cor. Sec. 32, T12N, R1E, SLM.

This application will be given a priority as of the date deposited and considered in the regular manner as it has been determined underground water was not withdrawn from appropriation.

(b) Application submitted by the Utah Water and Power Board for 300 c.f.s. and 35,000 acre-feet of water from Blacksmith Fork in Cache County. This application will be considered in the regular way with a priority of date of deposit as the Blacksmith Fork was restored to appropriation by the Governor June 2, 1949 in the Restoration Proclamation, Logan River in Cache County.

The Chief Deputy State Engineer requested comments from the group and, as there were no comments, the meeting was adjourned.

Subsequent to the public meeting held on November 18, 1955 and, after full consideration of the matter and taking into consideration those applications most conducive to the public good, the State Engineer ordered the applications filed in the office of the State Engineer in order of priority as given in the list attached hereto.
